Probability: Compound Events Lesson PDFs Generate Student Link Discussion Questions What is probability?ANSWERWe use probability to tell us how likely something is to occur. Probabilities have values from 0 to 1. A probability of 0 means something is impossible. A probability of 1 means something is certain. What is theoretical probability?ANSWERTheoretical probability is a probability that is calculated. For events with equally-likely outcomes, the theoretical probability is the number of ways the event can happen divided by the total number of outcomes in the sample space. There is a 0.2 chance that your family has chocolate cake for dessert tonight, and a 0.5 chance that your family has apple pie for dessert tonight. Which is more likely, chocolate cake or apple pie?ANSWERLikelihood increases with larger numbers. 0.5 is greater than 0.2, so it is more likely that your family has apple pie for dessert. What is the probability of tossing a coin and getting heads?ANSWER $\frac{1}{2}$ or 50% What is the probability of tossing a number cube and getting 5?ANSWER What are the methods you can use to find the probability of an independent compound event?ANSWERSample answers: make a table, draw a tree diagram, find the probabilities as single events and then multiply them to find the probability of the compound event When you calculate the probability of dependent events, what do you need to do after you have completed the first event?ANSWEROnce you have completed the first event, you need to see how the number of possible outcomes has changed for the second event. You also need to see if the number of favorable outcomes has changed. What is the probability of tossing three coins and having them all come up heads?ANSWERMake a table or list to show the outcomes: H H H H T H H H T T T T T T T T T T H H Only one of these 8 outcomes is H H H, so the probability of getting 3 heads is 1/8. or The probability of getting heads on a toss of a coin is 1/2. So the probability of getting 3 heads when tossing 3 coins is $\frac{1}{2} \times \frac{1}{2} \times \frac{1}{2}$ or $\frac{1}{8}$.Ms. Lee is having a dinner party. These are the choices for the menu:Main dish: steak, chickenVegetable: corn, green beans, broccoliDessert: lemon tart, strawberry ice creamShe decides to choose something from each list randomly to create the menu. Create a tree diagram that shows the probability of having chicken, broccoli, and strawberry ice cream at her dinner party. ANSWERThe tree diagram shows the choices of steak and chicken in the top row. Three branches from each main dishes show corn, green beans, and broccoli. Two branches from each vegetable show lemon tart and strawberry ice cream. The tree diagram shows that there are 12 different possibilities for the menu. Only one of those possibilities is chicken, broccoli, and strawberry ice cream. So the probability of having chicken, broccoli, and strawberry ice cream at her dinner party is $\frac{1}{12}$.There are 6 blue marbles, 4 yellow marbles, and 10 total marbles for the first pick, so the probability of picking a blue marble is $\frac{6}{10}$ or $\frac{3}{5}$.For the second pick, there are 5 blue marbles, 4 yellow marbles, and 9 total marbles, so the probability of picking a yellow marble for the second pick is $\frac{4}{9}$. The probability of picking a blue marble on the first pick and a yellow marble on the second pick is $\frac{3}{5} \times \frac{4}{9}$ = $\frac{12}{45}$ or $\frac{4}{15}$.iBienvenido a Generation Genius en español!Todos los videos de ciencia ahora doblados a español, incluyendo los materiales para maestros. ¡A disfrutar!Nuestros videos de matemáticas son nuevos y se están traduciendo. (Matemáticas en español en 2022) Teachers! Start a free trial & we'll send your gift card within 1 day. Only cards left. Try it now. Special Bonus: Get a \$5 Amazon gift card within 1 day if you join now. Only left. XIf you toss a coin twice, what is the probability that you get tails both times?You have in your closet:a green hat and a blue hatred socks, yellow socks, and blue socksblack gloves, brown gloves, and red gloveIf you choose one item from each list without looking, what are the chances that you choose the blue hat, the yellow socks, and the red gloves?A bag of marbles contains 3 red marbles and 2 purple marbles. Suppose you pick a marble out of the bag without looking and don't put it back in the bag. Then you pick another marble out of the bag. What is the probability that you pick 2 red marbles? Riddles are a great way to make a boring worksheet fun. However, I found students knew the answer to the riddle and just chose the answers to fill in the letters without doing any of the math. This way, students have to create the riddle before they can answer it. Save 50%: 7th Grade Probability Unit Create the Riddle Activity Bundle * Perfect for centers, homework or independent/group practice * Engaging activity for students to practice * Answer Key includedThis is a collection of Google Forms designed to be used through the Google Classroom platform.These forms are perfect for in-class practice, homework assignments, or even as mini quizzes!All of the Google Forms are currently set to beauto-gradedshow progressallow one answershow results when submittedbut all of these features can of course be adjusted and set to your needs. You can also always edit, remove, or add any problems.Unit 1: Ratios & Proportional ReasoningUnit Rates (10 short answProbability Review Stations - Cooperatively This set includes 8 probability stations, recording sheets, and an answer key. Students will move from station to station to review the following concepts:Theoretical ProbabilityExperimental ProbabilityCompound ProbabilityDependent and Independent EventsExpected OutcomesTotal Outcomes (Fundamental Counting Principle)It is recommended that you have the following supplies to use this activity effectively:Color Printer (8 pages total, not per student, should be printed in color)3 dice2 coins1 papeProbability Study Guideby Are you getting ready for standardized tests and need some extra worksheets? Do you need to supplement your regular algebra curriculum with probability concepts? This printable study guide will be great for any teacher who is covering probability. This study guide covers the following concepts: Part 1 - Simple probability using "number cubes" (dice) and cards. Part 2 - Compound Probability with Replacement Part 3 - Compound Probability without Replacement Part 4 - Independent Events Part 5Teach compound probability (multiple, separate events) with these guided notes! The notes include a constructed, fill-in-the-blank definition, calculation section, and two examples that refer to probability of coins, dice, and cards! Teacher key is included.This bundle includes over 130 of my 7th grade activities. There are card sort activities, dominoes activities, coloring worksheets, hidden message cut and paste activities, and so much more! Here is a breakdown of all the activities included:1.) 7th Grade Math Beginning of the Year Review Worksheet2.) 7th Grade Math End of the Semester Coloring Worksheet3.) 7th Grade Math End of Year Review Hidden Message Activity4.) 7th Grade Number Sense Booklet Version 1 & 25.) Absolute Value Coloring Wor7th Grade Reteaching Math Worksheetsby To the Square Inch- Kate Bing Coners7th Grade Math Reteaching Worksheets by TopicThis set of 60 printable worksheets is a perfect way to give your students additional practice on all 7th grade math topics and keep them engaged. Each page focuses on one topic and gives students a reteaching review and 6 practice problems. These worksheets make great homework assignments, sub plans, remediation and enrichment. This aligns with the To the Square Inch 7th Grade Math Curriculum and follows the Common Core Standards. It is easy to mix aThis quiz asks students to make predictions based on theoretical probabilities of simple and compound events. This is very similar to my 7.6C and 7.6H quizzes, because the TEKS are similar. However, these are all new questions, so all three can be used in the same class.ALL 7TH GRADE TEKS QUIZZESPart of the TEKS quiz series, available for all 7th and 8th grade math TEKS. Each quiz contains ten questions of varying levels. Please click the preview button to see the quiz in its entirety and assessCompound Probability Card Sort Activity Lessonby This lesson unit is intended to help you assess how well students are able to find probabilities of compound events using organized lists, tables, tree diagrams, and simulation. Understand that, just as with simple events, the probability of a compound event is the fraction of outcomes in the sample space for which the compound event occurs. Represent sample spaces for compound events using methods such as organized lists, tables and tree diagrams. For an event described in everyday language (e.Don't let probability bully your students! The Mosaic Probability Math Task provides practice with the likelihood of events, predicting the probability of chance events, developing probability models, and finding the probability of compound events. With six low-prep versions of the task, your students will soon be confident and competent, and your classroom will be a bully-free math zone! The following downloads are included with this product:Instructions for teachersMosaic Probability - Math PerProbability Unit | Cornell Notesby Each worksheet in this download provides students with an Essential Question, Vocabulary Section, and Guided Practice. This is a great resource for ALL students, especially for students enrolled in AVID courses! Worksheet #1: Probability of Simple & Compound EventsWorksheet #2: Independent vs. Dependent Compound EventsTEKS Supported7.6(1) Determine experimental and theoretical probabilities related to simple and compound events using data and sample spaces.7.6(E) Find the probabilities of a7th Grade Math Digital Notes and Activities BundleThis is a growing bundle. As new 7th grade notes and activities are completed, they will be added for free. 7th Grade Math Digital Notes for Google DriveThis product contains 58 sets of Google Slides notes- students can complete notes and practice digitally. Included for each topic:Guided Notes and guided practice-Practice Problems-Vocabulary Models-2 warm-ups-2 exit slips-1 page with Google Tools Shortcuts for student use-Answer KeysThe NumberGrade 7 Math - Compound Probability - Math Bingo Task Cardby This is a set of 16 task cards for a middle school math class. The task cards should be printed double-sided with the shorter side being the flipping side so that the answer key is on the back. It is suggested that they are printed on cardstock for long term use.In this activity, students will be guided through:finding the compound probability of 2 events happening at the same timeflipping a coin, spinning a spinner, rolling a die, picking a number out a set etc.This resource:can be used for aPage 2Make sure your students are mastering the grade-level standards at a rigorous high-stakes testing level. These TEKS & STAAR Aligned 10 Question Assessments are easy to incorporate as quick checks, review, practice, progress monitoring, guided math, intervention, and test prep! These STAAR Practice assessments are grouped by related standards/topics allowing for targeted practice. The 10-question format makes test prep, review, and practice much more manageable! This resource is now availabl
